

Case Study: Melton Underpass

Project: Melton Underpass

Problem: The tunnel was frequently being targeted for graffiti with spray paints

Product used: GP101 – Anti Graffiti Protective Clear

Product Function: It's primary function is to provide protection from graffiti paint , fly posting and marker pens. Applying GP101 allows you to then easily wash away any subsequent coatings on top with just water.

Surfaces: These surfaces are typically concrete, brick or stone.

Project Completed: In 2012 & Still going strong.
