PAINTS, PRIMERS AND SPECIALISED COATINGS

Case Study: Dampshield and ProFloor PLUS CC

Project: Warehouse floor

Products used: Dampshield and ProFloor PLUS Cold Cure

Product Functions: Dampshield is a gas-permeable membrane that enables earlier covering of new concrete. Also has excellent adhesion properties. Our Profloor Plus CC is a low temperature curing, heavy duty, solvent free floor paint with outstanding resistance to abrasion. This paint is designed to cure when the surface temperature is in the range of 0-10°C. It allows the painting of floors in colder weather.

Surfaces: Concrete Floor

Project Completed: May 2018

COVERING OUR CUSTOMERS' NEEDS SINCE 1908
